WORK EXPERIENCE

Frontend Developer Decubate | March 2024 - now
Technologies: React, TypeScript, Tailwind

- **Built and scaled** internal compliance systems with React, Next.js, TypeScript, and Tailwind, enabling Decubate to become the first Markets in Crypto-Assets (MiCAR)-licensed crypto launchpad in the EU.
- **Designed and implemented** intuitive UI/UX workflows, improving review efficiency and reducing compliance risk exposure.
- **Crowdfunding Platform:** Contributed to the maintenance and enhancement of our IDO platform, implementing new features, optimizing performance, and ensuring long-term reliability.
- **Developed an internal CI/CD automation tool** using Next.js, TypeScript, and GitHub API, streamlining pull requests and configuration management.
- **Led cross-functional knowledge-sharing workshops**, fostering collaboration and continuous learning across teams.

Junior Frontend Developer Exelin Digital | 09-12/2022
Technologies: HTML, CSS, JavaScript, ReactJS, Git, GitHub

- Built authentication and dashboard pages with React Router DOM and Axios, implementing responsive layouts with SASS architecture.

Tutor in Pedagogy & Research | Learner Support
Voxy | September 2021- April 2024
Deliver personalized online English instruction to international professionals using the TBLT methodology, having taught 4000+ classes.

SOCIAL WORK

Frontend Developer 8BillionMinds | May 2023 - August 2024
Technologies: HTML, CSS, JavaScript
Developing features for a new, free education system for the world via a live-learning platform. Collaborated on website enhancements and features, improving user interface and experience.
